Company history

Ten years ago, Vigen Grigoryan started his business: "Gregorian" group, to invest his 20 years of experience, creativity, and passion for creating a new direction in the Armenian alcohol industry.

These ten years our company has been working on the sells of high quantity alcoholic drinks. In these years, we could develop our technologies, new types of products. We have become a distributor of wine and spirits to many Armenian, Russian, Ukrainian alcohol-producing companies.

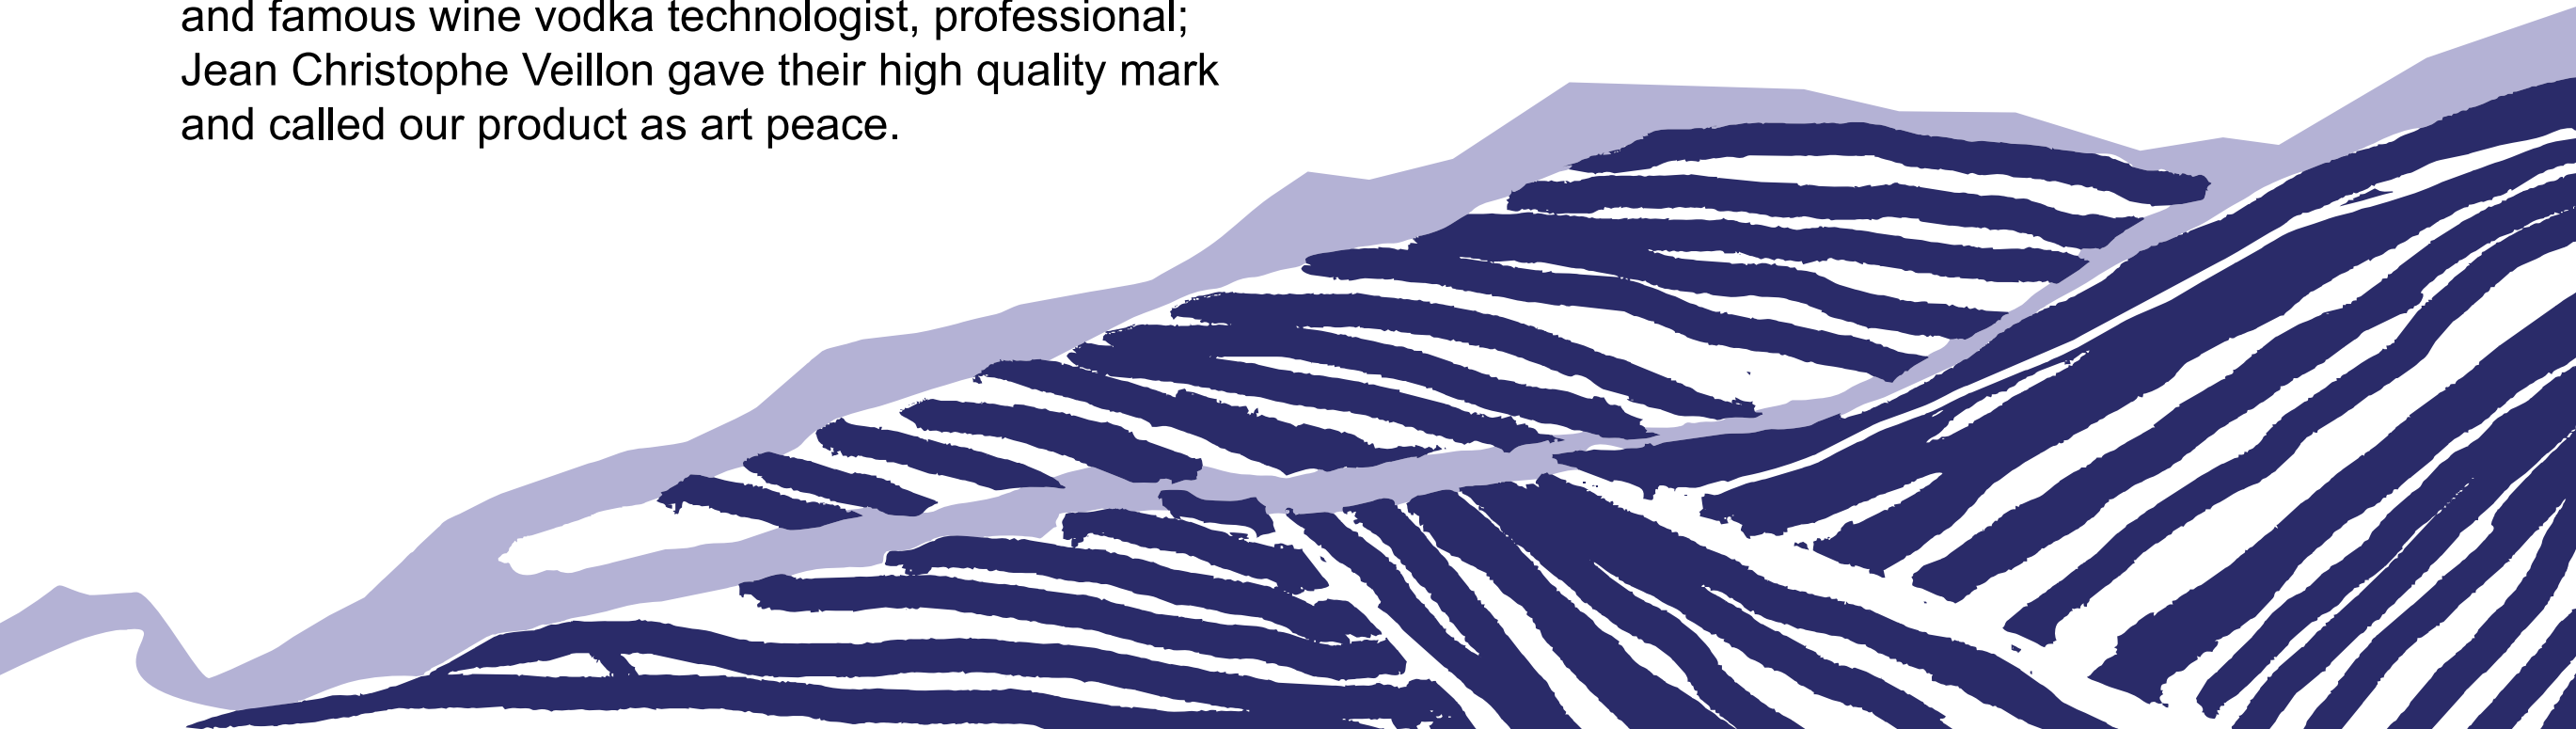

In 2020 we decided to start our own bottled product to share our achievements with direct costumers and change their perception about high-quality alcoholic drinks.

"HOROVEL" FRUIT VODKA

Fruit vodkas are made from Armenian grown fruits, due to our special technologies they preserve Fruit aromas with a smooth taste.

THE IDEA OF HOROVEL

Horovel (plow song), the traditional song of the Armenian peasant farm work (also the main type of song), which was played while plowing, to inspire the working animals, to lighten and stimulate the work. He also expressed the social complaint, personal emotions, and feelings of the villager. We tried to transfer that emotions and feelings through our vodka to our customers.
